DIGITAL DENTAL CONSULTING IN YOUR OFFICE IN YOUR TIME IN YOUR OWN WAY

Everyone is talking about reaching the “next level.” At DIY, we want you to reach *your* “next level” of success. We want you to be in total control of your results; at the end of the day, nobody cares more about your success than you.

Ambiguous direction and objectives can cause team members to disengage, cost you thousands of dollars per month, affect profitability, and have an unfavorable impact on your patients. Without a process to follow, you’re just winging it, and that’s not a good business strategy.

The DIY Digital Dental Consulting program guides you through our 200+ pages of wisdom, “tried and proven” tools of the trade, advice, and successful methods for implementing the following systems, protocols, letters, scripts, tracking, and more. AND the indispensable feature of the DIY DIGITAL DENTAL CONSULTING EXPERIENCE is that the decision about pace, implementation, and the final seal of approval will always be yours!

- Leadership
- Discovery I & Discovery II
- Communication
- Team Calibration
- Cash Flow
- Case Acceptance
- Internal/External Marketing
- Tracking & Accountability
- Systems & Protocols
- New Patients
- Admin/Front Desk
- Dental Assistants
- Hygiene
- Hygiene Continuing Care

We want this to be the vehicle those practices not working with a consultant or coach can easily afford. Besides increasing efficiency, enhancing case acceptance, improving verbal skills and monitoring cash flow losses, the many marketing ideas within can infuse your practice with new growth you never dreamed possible!
